

Aditya Godse

 github.com/adimail  adimail.github.io  aditya.godse747@gmail.com

SKILLS

Languages: Go, Python, TypeScript, JavaScript, Bash, SQL, LaTeX, Powershell Scripting, Java, WebSockets
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Nginx, Cloud Networking, Git, Self-Hosting, Linux
Frontend & UI: React, Next.js, Tailwind CSS, Figma, Tanstack, Claude Design, Remotion, Motion Graphics
Backend & Databases: Node.js, PostgreSQL, Redis, RESTful Services, Auth & Authorization, RAG, Vector Databases

OPEN SOURCE

OpenSSL | *C, Perl, Linux, CLI Tooling*

- Collaborated with global maintainers to implement a new `-cipher` CLI option in OpenSSL's `req` command, significantly enhancing security flexibility by moving beyond the legacy 3DES encryption default. ([PR: 25796](#))
- Adhered to strict open-source contribution guidelines, including writing comprehensive man-page documentation, creating regression tests, and navigating a rigorous code review process. ([PR: 25839](#))

EXPERIENCE

AISSMS IOIT ACM Student Chapter, Chairperson & Webmaster May 2024 – May 2026

- Led a 100+ member organization to win the **ACM India Outstanding Chapter Award 2025–26**; directed national hackathons, MUN, and technical conferences for 3,500+ attendees.
- Architected **Chapter OS** and competition platforms using Rust, TypeScript, and Go; established CI/CD pipelines and automated chapter operations (attendance, CRM, ID generation).

Hosteze, Co-Founder | *React Native, AWS Lambda (Java), DynamoDB, S3, IAM* Feb. 2024 – May 2025

- Co-founded a proptech co-living platform in Pune; designed end-to-end serverless architecture on AWS utilizing DynamoDB single-table design and Java-based Lambda functions.
- Engineered the cross-platform mobile application using React Native, implementing complex local state management, real-time booking flows, and automated CI/CD deployments.

PROJECTS

Bit-by-Mail: Self-Hosted Bulk Email Automation Platform | *Python, React, TypeScript, SQLite, WebSockets, CI/CD*

- Engineered a self-hosted React/TypeScript and Python (Tornado) bulk email platform, capable of processing 10,000+ emails/hour, and distribute the application globally via PyPI as a Python package.
- Architected a fault-tolerant SMTP dispatch engine streaming real-time campaign telemetry to a React dashboard via full-duplex WebSockets with <50ms latency, maintaining a 99.5%+ successful delivery rate during load testing.

Real-Time Deep RL Rocket Landing & Telemetry Platform | *Python, Reinforcement Learning, Physics*

- Developed a real-time fleet telemetry and deep RL environment for automated rocket soft-landings, accelerating training convergence by >2x (400k vs 850k steps) using dynamic reward shaping.
- Optimized full-duplex WebSocket throughput by architecting a custom binary payload encoder, cutting network bandwidth to 1.9 KB per tick for 30 concurrent rockets while eliminating browser garbage-collection stalls.

Interactive 3D Spatial Film Database | *TypeScript, React, Three.js (WebGL), Zustand, CI/CD*

- Designed and built an interactive 3D spatial visualization engine using React-Three-Fiber and WebGL to render and navigate a multi-dimensional dataset of movies within an infinitely generating universe.
- Architected a custom mathematical pipeline to project 12-dimensional data into 3D Cartesian space, implementing dynamic frustum culling, spatial filtering, and a real-time camera-driven recommendation engine.

Distributed Geospatial Geometry & Terrain Modeling Engine | *Golang, React, Three.js, PostgreSQL, Redis, Docker*

- Engineered a high-performance geospatial pipeline to reconstruct 3D topographical environments from 2D GPS telemetry (GPX) by projecting WGS84 coordinates into localized Cartesian space.
- Built an interactive 3D rendering engine using Three.js and React-Three-Fiber, featuring real-time animation of route progress and dynamic lighting calculated from terrain normals.

EDUCATION

AISSMS Institute of Information Technology Sept 2022 - May 2026

Bachelor of Technology, Artificial Intelligence and Data Science CGPA: 7.72/10

OTHER ACHIEVEMENTS

- Earned the LeetCode Knight badge, ranking among the **top 5% globally** for algorithmic problem solving.
- **Top 15%** in Kaggle CIBMTR - Equity in post-HCT Survival Predictions competition (Rank 491/3278).
- Title Holder for Asia's Largest Painting on Recycled Paper Canvas. ([Link here](#)) (Aug. 2021)
- 2-time National Level Rope Skipping Gold Medalist (Double unders & Spot jump) (2016 - 2017)
